

Technical Report

Analysis and facts about the infringement of 98.220.43.119 in June 6, 2012

Lipscomb, Eisenberg & Baker, P.L.

Facs

Client: Malibu Media

Attorney: Lipscomb, Eisenberg & Baker, P.L.

Title: CONNIE ROMANTIC MEMORIES

FileHash : 9CA481711F4532C0AC8CBFD3BA22A74D1EF205E2

IP Address: 98.220.43.119

ISP/ Netblock Owner: Comcast Cable

Geographic Location: Franklin, US

Infringement Details

Our system has detected unauthorized copying and/or distribution of the work above-mentioned by analysing network traffic that proves the infringement flawlessly.

The infringer used the BitTorrent technology (via client software μ Torrent 3.1.3) to copy and/or distribute the file(s) listed below.

Packet Sniffer - Summary

We've monitored the affected network connection from the infringer to us gapless, as you can see on page #6. To prove the offense in later time, we archived the full-size packet dump to reconstruct the case restoring the whole transferred data.

Shortened, we can extract the following process from the network packet dumps.

Line # Description

- 2 BitTorrent Handshake initialization by the opponent in this session.
- 3 We confirm the handshake request.
- 4 Opponent sent information about pieces that already have been downloaded successfully.
- 7 We pretend the interest of the piece(s) offered by the opponent.
- 8 Opponent has sent us a positive reply, meaning we should go forward.
- 9 We request the correlating torrent piece from the opponent.
- 10 Opponent sends us the requested piece.

Packet Sniffer - Results

The following logfile shows the network activity between the file-sharing user and our systems.

Explanation of the columns

#	Consecutive numbering.
Date, Time	Moment of the communication.
Source (IP:Port), Destination (IP:Port)	Source describes the IP address of the sender; Destination describes the IP address of the receiving side. The communication is like an dialog in which both parties are sending and receiving network packets. Our systems may request pieces, so it also can be the sender. But it comes down to an infringement when the sender is sending a piece to us.
Protocol	Describes the used networking protocol was used to send the packet.
Length	Length of the network packet.
Data	Short and human readable information about the packet content was being sent/received.
